

COMPETITION – WIN A CHROMEBOOK!

GBR Technology Ltd, stand 506, will be running a competition at BTME 2025 where we are asking our stand visitors to guess the weight of the Striker liquid fertiliser and biostimulant. Guess the combined weight of the Striker and container to be in with a chance of winning a Chromebook!

Striker is a biostimulant and liquid fertilizer for sports turf. It contains fast, medium and sustained release nitrogen sources; calcium and magnesium; chelated iron (DTPA chelate); amino acids and cell burst extract of seaweed.

Pop along to **stand 506** to have a go, ask more about Striker, and say hello to the GBR team – we'd be very happy to see you!

Good luck!

Closest wins, if more than one correct answer (or more than one closest answer) – they will go into a draw to pick the winner. By completing this form and submitting your entry into this competition, you agree that you will be automatically registered to receive our latest news and free newsletter by email. You can unsubscribe at any time. The winner will be contacted by GBR Technology Ltd in order to arrange delivery. The prize is not transferable / no cash alternative.
